

Energy Management Policy

Consistent with the HSE Policy Combined Chemical Services (UK) Ltd is constantly striving to improve energy efficiency in the company.

Combined Chemical Services (UK) Ltd supports the improvement of performance in the areas of energy and greenhouse gas emissions. In order to do this, we shall:

- Enhance energy conservation awareness and encourage participation of the stake holders in all related activities.
- Continually monitor and improve processes to reduce and control energy consumption.
- Comply with applicable standards and regulations as well as any other requirements concerning energy use and efficiency.
- Ensure information and resources are available to achieve our objectives.
- Manage energy performance in a systematic way with a focus on efficiency and continuous improvement
- Favor the purchase and use of energy efficient products, services and sub-contractors.
- Continue to promote renewable energy sources to reduce the usage of fossil fuels and greenhouse gases.

James Marshall

Managing Director
